Problema 1 (IMO 1986, 2) Given a point P_0 in the plane of the triangle $A_1A_2A_3$. Define $A_s=A_{s-3}$ for all $s\geq 4$. Construct a set of points P_1,P_2,P_3,\ldots such that P_{k+1} is the image of P_k under a rotation center A_{k+1} through an angle 120^o clockwise for $k=0,1,2,\ldots$ Prove that if $P_{1986}=P_0$, then the triangle $A_1A_2A_3$ is equilateral.
